IMFS Annual Reports

IMFS Executive Board

The Institute for Monetary and Financial Stability (IMFS) is a research center at Goethe University Frankfurt, located in the House of Finance. Its focus is on the tasks, competences and powers of central banks in monetary policy, financial regulation and financial supervision as well as their impact on the financial system and the real economy. The members of the Executive Board are the professoral members of the center as well as professors of Goethe University whose research focuses on IMFS-related topics.

Volker Wieland, Managing Director

Roland Broemel, Deputy Managing Director

Michael Binder

Michael Haliassos

Alexander Meyer-Gohde

Helmut Siekmann

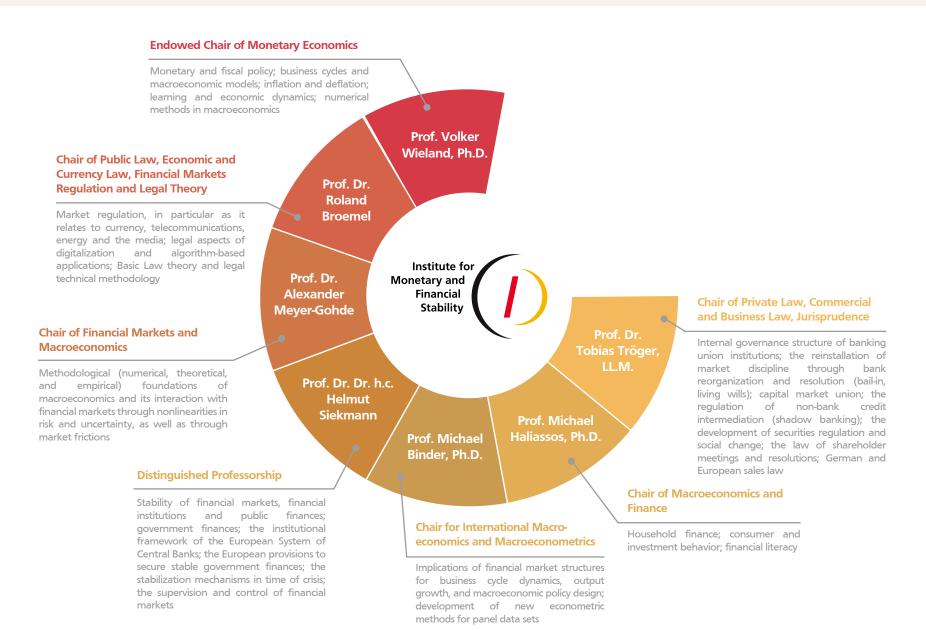

Tobias Tröger

IMFS Chairs and Research Professors

Research Topics

These nine broad research topics are being used in this overview to visualize the focus and breadth of IMFS research over time in the form of articles in scientific journals, working papers, contributions to books and policy papers and reports. They do not constitute formal research programs or areas.

Affiliated Professors

Affiliated researchers are external scholars with common research interests and relevant expertise who collaborate with IMFS researchers on certain occasions.

Petra Geraats
Senior Lecturer at the Department of Economics at the University of Cambridge

Heike SchweitzerProfessor of Civil Law, German and European Commercial and Competition Law and Economics at Humboldt University Berlin

Luisa Lambertini
Professor of International Finance at the Ecole Polytechnique
Fédérale de Lausanne

Maik Wolters
Professor of Monetary Economics and International Financial
Markets at the University of Würzburg

IMFS Distinguished Fellows

Prof. Dr. Dres. h.c. Theodor Baums

Prof. Dr. Dr. h.c. Reinhard Schmidt

Dr. Willy Friedmann

Dr. Jens Weidmann

Prof. Dr. Hermann Remsperger

Gerhard Ziebarth

IMFS Distinguished Fellows are exceptional individuals with great experience in policymaking institutions or in the financial sector who have made outstanding contributions to the IMFS and its activities in research and policy advice.

IMFS Research Fellows

Prof. Tobias Adrian, Ph.D.

Prof. Dr. Emanuel Mönch

Prof. Michael Bauer, Ph.D.

Prof. Athanasios Orphanides, Ph.D.

Prof. Dr. Günter W. Beck

Prof. Dr. Maik Wolters

Dr. Petra Geraats

Prof. Dr. Heike Schweitzer, LL.M. (Yale)

Prof. Luisa Lambertini, Ph.D.

Prof. Dr. Peter Tillmann

IMFS Research Fellows are excellent scholars from other universities and institutions who collaborate with one of the IMFS professors.

Timeline

March: The ECB and Its Watchers XV

April: Version MMB 2.0 of the Macroeconomic Model Data Base (MMB) is available. For the first time, it comprises models developed in the aftermath of the financial crisis

May: Vikrant Vig takes over the Endowed Chair of Financial Economics **January**: IMFS Interdisciplinary Study "The ECB's Outright Monetary Transactions in the Courts" published

March: IMFS-CEPR Research Meeting on Global Banking and Bank Resolution March: The ECB and Its Watchers XVI April: The ECB and Its Watchers XVII

June: IMFS graduate Jenny Gesley named one of two recipients of the Baker & McKenzie Award 2015 in recognition of her dissertation March: Goethe University announces that IMFS will expand its research activities and will receive funding for the next ten years

April: Final conference of the MACFINROBODS project

April: The ECB and Its Watchers XVIII

May: On the occasion of the 70th birthday of Theodor Baums, Helmut Siekmann edits a collection of essays on German, European and international commercial law

May: Volker Wieland appears as expert before the Federal Constitutional Court regarding the governments' handling of banking supervision during the financial crisis

June: Volker Wieland receives Public Service Fellowship by the foundation of Alfons and Gertrud Kassel

June: First research conference of the Macroeconomic Modelling and Model Comparison Network (MMCN) at Campus Westend

2014

2015

July: Theodor Baums and Reinhard H. Schmidt appointed as Distinguished Fellows

September: Willy Friedmann and Hermann Remsperger appointed as Distinguished Fellows 2016

August: Version 2.1 of the Macroeconomic Model Data Base (MMB) is available. The platform at www.macromodelbase.com contains 68 models

November: IMFS is the representative of Goethe University among the academic members of the European Banking Institute (EBI)

December: Hoover Institution and IMFS win Sloan Foundation Grant for the Macroeconomic Model Comparison Initiative (MMCI)

December: The Macro Model Base team contributes a chapter to Handbook of Macroeconomics titled "New Methods for Macro-Financial Model Comparison and Policy Analysis"

2017

September: IMFS Interdisciplinary Study on "Quantitative Easing in the Euro Area: Its Record and Future Prospect" published March: The ECB and Its Watchers XIX

April: Alexander Meyer-Gohde takes on Professorship of Financial Markets and Macroeconomics

April: Volker Wieland nominated for another five-year term as a member of the German Council of Economic Experts

May: New version MMB 2.3 on the website www.macromodelbase.com contains 114 models

June: Macroeconomic Model Comparison Network (MMCN) holds second research conference at the Hoover Institution

March: New version MMB 3.0 at the website www.macromodelbase.com offers 128 models and further technical features

March: 20th anniversary of the conference The ECB and Its Watchers

May: Volker Wieland receives 2019 prize of the Monetary Workshop in recognition of his research

June: Third research conference of the Macroeconomic Modelling and Model Comparison Network (MMCN) at Campus Westend

January: New version MMB 3.1 on www.macromodelbase.com offers 153 models

February: EBI and IMFS jointly organize conference on banking regulation

February: IMFS conference The ECB and Its Watchers becomes part of the series of listening events regarding ECB strategy

May: IMFS starts webinar series on Macroeconomic Modelling and Pandemics

June: Volker Wieland gives statement in a public consultation of the Bundestag's budget committee

May: Volker Wieland joins Advisory Board of the Stability Council

June: Michael Haliassos receives Hillcrest Best Paper Award in Behavioral Finance

2018

July: Roland Broemel assumes Chair of Public Law, Economic and Currency Law, Financial Markets Regulation and Legal Theory

August: Helmut Siekmann is appointed Distinguished Professor

October: Michael Haliassos joins the Executive Board

October: Heike Schweitzer becomes

Affiliated Professor

2019

October: Petra Geraats, Luisa Lambertini and Maik Wolters join as Affiliated Professors

December: Festschrift in honor of Helmut Siekmann on "Monetary Union, Central Banks and a Stable Financial System" published

2020

September: The ECB and Its Watchers XXI

2021

September: Alexander Meyer-Gohde receives DFG funding for research project on macroeconomic models

December: IMFS launches new book series on money, currency and finance

December: Epidemic Macro Model Database (Epi-MMB) is launched

December: Commentary on the European Monetary Union edited by Helmut Siekmann is available in English

Major Research Projects

MACFINROBODS

In 2017, the funding for the MACFINROBODS project, a 2.5 million euros three-year FP7 research grant by the European Commission for a research network on "Integrated Macro-Financial Modelling for Robust Policy

Design", expired. The grant had been obtained by Michael Binder and Volker Wieland in 2013. The project ended with a final conference in April 2017, organized by the IMFS. John B. Taylor of the Hoover Institution gave the keynote speech at this final MACFINROBODS event.

MMCI / MMCN / MMB

The Macroeconomic Model Comparison Initiative (MMCI) is a large-scale research project of the IMFS. With the aim of rendering research on structural macroeconomic modelling substantially more reproducible, replicable, comparable and collaborative, Hoover Institution at Stanford University and the IMFS launched and established the MMCI in 2017. Within the MMCI, John B. Taylor, the Mary and Robert Raymond Professor of Economics at Stanford University and the George P. Shultz Senior Fellow in Economics at the Hoover Institution, Volker Wieland and Michael Binder contributed as principal investigators. The Alfred P. Sloan Foundation awarded a three-year grant in the amount of \$591,295 in support of the MMCI. The funding ended by the end of the first quarter of 2020. More than 150 models developed by researchers around the world are reproduced systematically

and integrated into the platform Macroeconomic Model Data Base (MMB) available at www.macromodelbase.com.

Another important aim of the project was to initiate the Macroeconomic Modelling and Model Comparison Network (MMCN). This is a network of researchers interested in systematically comparing models and contributing to policy applications. The network is run in cooperation with the Centre for Economic Policy Research (CEPR) in London. It serves as a platform for promoting collaboration of researchers who are working on issues of model replication and comparison, and increases the visibility of MMCI.

Epi-MMB

The Epidemic Macro Model Database (Epi-MMB) is a new resource for researchers and policy analysts who want to assess macroeconomic and health impact of epidemics and appropriate policy measures. The first-stage archive developed by Mathias Trabandt, Volker Wieland and the IMFS team features more than 20 models at the start and will be expanded. For each model a short summary

and the replication code to download are available at www. epi-mmb.com. Thus, different scenarios can be applied.

Commentary on the European Monetary Union

A comprehensive commentary on all 50 articles of the Statute of the European System of Central Banks (ESCB) and the European Central Bank (ECB) edited by Helmut Siekmann was published in December 2021. The book titled "The European Monetary Union - A Commentary on the Legal Foundations" contains over 800 pages explaining the complete legal basis of the European Monetary Union. This gives the book a unique position in the legal literature on the law of the EU. It is an expanded and updated translation of the 2013 German commentary "EWU Kommentar zu Europäischen Währungsunion" edited by Helmut Siekmann. Roland Broemel is also among the more than 20 experts who contributed to this commentary.

Centre Responsible Digitality (ZEVEDI)

The Centre Responsible Digitality (ZEVEDI) is a research network which combines the scientific expertise of researchers based at Hessian universities. Roland Broemel is a principal investigator of the ZEVEDI- project group AI & Finance – Innovation, Resilience and Responsibility. The group brings together research from the fields of law, economics, information systems research and computer science. Within the project group, the IMFS is responsible for the area "Central Bank Digital Currencies (CBDC)", one of the three research areas of the project group. In workshops and conferences, the IMFS has contributed to the dialogue between experts from academia and members of the Deutsche Bundesbank and the European Central Bank (ECB). The research of the IMFS is to work out the legal framework conditions on the basis of an economic analysis, but also the need for adaptation of the monetary law concepts in view of the effects of digital currencies.

DFG Grants

In 2021, Alexander Meyer-Gohde received the funding approval for a research project on macroeconomic models from the German Research Foundation (Deutsche Forschungsgemeinschaft, DFG). The DFG will fund the project titled "Numerical diagnostics and improvements for the solution of linear dynamic macroeconomic models" with an amount of 250,000 euros until 2024.

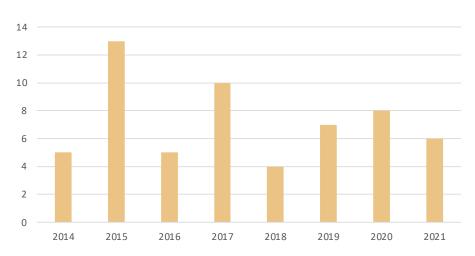

German Research Foundation

Until 2014, Volker Wieland received a three-year DFG funding of about 180,000 euros for the project "Recursive Estimation, Forecasting and Learning in Dynamic Macroeconomic Models, including Micro-Founded General Equilibrium Models". The goal of this project was to create a computational platform that allows estimating macroeconomic models and comparing their forecasting performance using realtime data. An additional element was the consideration of an alternative expectation formation mechanism – adaptive learning – that could potentially improve the fit of the model relative to the standard version under rational expectations (RE). In this context, the Macroeconomic Model Data Base (MMB) was extended.
